

# Airmate Electrical Co., Ltd.

“ By using Cimatron's software, we were able to upgrade our mold design. We achieved a higher level of accuracy and, as a result, better quality products. The Cimatron technical support team understands the specific needs of tool makers.

Daniele Luo, Technology and Materials Manager

”

**Industry** Production of household electrical appliances, including electric fans, heaters, induction cookers and kettles

**Location** Shenzhen, China

**Website** [www.airmate-china.com/en](http://www.airmate-china.com/en)

**Airmate Electrical Co., Ltd, China,**

is a leading producer of state-of-the-art electrical appliances for the home, including electric fans, heaters, induction cookers and kettles. Established in 1973, the company is based in Shenzhen, China, and exports to over 60 countries around the world.”

## The Challenges

- Shortening production time and allowing for a greater turn-around
- Designing large, complex electrodes
- Producing a mold with outstanding surface quality to make the products' appearance a priority

## The Solutions

The CimatronE integrated solution for design and manufacturing of molds and electrodes

## The Results

- Increased speed of production
- Higher quality of molds and products
- More precise and sophisticated electrodes
- Improved technological ability of Airmate's engineers
- Easier and more efficient developing of new products
