3D Systems CEO Avi Reichental Delivers Keynote at CeBIT 2014

- Livestream of Reichental's keynote available here

ROCK HILL, South Carolina –March 11, 2014 – 3D Systems (NYSE:DDD) announced today its CEO, Avi Reichental, will deliver a keynote address on *Manufacturing the Future* at CeBIT 2014 in Hannover, Germany. Reichental will speak on Friday March 14, 2014, at 12:15 local time, Hall 8, Center Stage, Hannover Exhibition Grounds, Germany. A livestream of Reichental's keynote can be viewed here.

CeBIT 2014, hosted by Deutshe Messe AG, brings together more than 4,000 companies from 70 different countries for 5 days to showcase high-tech's latest innovations. Thousands of live attendees along with over 37,000 online followers learn, discuss, debate and shape the digital world's hottest topics, trends and innovations from game-changing and emerging technologies to their impact on business and society.

Reichental's keynote is part of the game-changing technologies program and he will speak on how 3D printing is manufacturing a future that integrates virtual design with physical production and free from complexity, entering the world into an era of bold localized, digital craftsmanship.

###

About 3D Systems Corporation
3D Systems is a leading provider of 3D printing centric design-to-manufacturing solutions including 3D printers, print materials and cloud sourced on-demand custom parts for professionals and consumers alike in materials including plastics, metals,

ceramics and edibles. The company also provides integrated 3D scan-based design, freeform modeling and inspection tools. Its products and services replace and complement traditional methods and reduce the time and cost of designing new products by printing real parts directly from digital input. These solutions are used to rapidly design, create, communicate, prototype or produce real parts, empowering customers to *manufacture the future*.

Leadership Through Innovation and Technology

- 3DS invented 3D printing with its Stereolithography (SLA) printer and was the first to commercialize it in 1989.
- 3DS invented Selective Laser Sintering (SLS) printing and was the first to commercialize it in 1992.
- 3DS invented the Color-Jet-Printing (CJP) class of 3D printers and was the first to commercialize 3D powder-based systems in 1994.
- 3DS invented Multi-Jet-Printing (MJP) printers and was the first to commercialize it in 1996.

Today its comprehensive range of 3D printers is the industry's benchmark for production-grade manufacturing in aerospace, automotive, patient specific medical device and a variety of consumer, electronic and fashion accessories.
